The Delta Phi men gave the first of their house warming parties Thursday evening at the chapter house for the members of the faculty and the parents of the fraternity men. The hours were from 8 to 10 and during the evening about two hundred guests called. Those in the receiving line were: Mr. and Mrs. Robert Stone, Dr. and Mrs. Glenn Millie, Miss Dorothy Scott, Miss Yetta Conkling, Mr. Leo Mooney and Dr. Leo Haughey. Punch was served by Miss Marguerite Mills, Miss Helen Lindsay, Miss Edna Hill, Miss Mildred Guld, Miss Rachel Hotchkiss and Miss Laura Armstrong.

The party this afternoon was for the girls of the college. The acre boys of the chapter have been planning a big surprise for the entertainment of the girls this afternoon. An unexpected caller at the chapter house this week felt some dismay when she stepped onto the veranda to hear shouts of "murderous wretch," and sounds of

lively combat oozing through the screen door. The tones had a note of seriousness in them that cautioned the intruder to skulk outside the door a moment and take observations; then considering that a peacemaker might be needed within, she boldly rang the bell and was admitted to the bloody scene. Explanations were duly made, after an oath of secrecy had been taken by the visitor, that all the commotion was in preparation for the drama which was to be the surprise feature of Friday afternoon's party. An account of the success of the play and the astonishment of the audience cannot be told until tomorrow.

Mrs. W. H. Jacobs of Western avenue gave a May party Thursday afternoon at her home for the primary department of Bethany college, in which her daughters, Elsie and Bertha, are pupils.

The students of the Washburn law school will have an informal party tonight at the class rooms, 118 West Eighth avenue.

Mrs. A. B. Mahaney celebrated her twenty-fourth birthday last evening, at the home of her daughter, Mrs. O. C. Trimmer, 1275 Polk street, a few friends of the family having been invited by Mrs. Trimmer. Mrs. Mahaney came to Kansas in 1856 from Lexington, Mo., with her first husband, Lewis W. Mahaney, and settled at Lawrence, where Mr. Mahaney entered the bakery business. During the Quattrell raid he was shot down by the raiders in the presence of his wife and children, and her husband became white from the shock within 24 hours. Mrs. Mahaney is mentally bright, hale and hearty, and the mother of eight living children, among whom were two pairs of twins. She saw Halley's comet when it was visible in this country before, and offered to play high five last night with the guests present until the comet to appear this morning.

The dance by the members of the former high school sororities, the Lambda Alpha Lambda and the Omicron, will be postponed from Saturday night to Friday evening May 27.

### EVENING CHAT

BY RUTH CAMERON.

I read in a newspaper the other day of the establishment of a "school of matrimony" which was to have courses in dressmaking and millinery, in domestic science and in the nursing and care of children.

I found it after all, merely a fragment of the editorial writer's active brain. I wish it had not been. I wish there might be such a school publicly maintained in every city in the United States, and that a year or two at it might be considered as indispensable a part of the middle class girl's education as her high school course.

We say most emphatically that no man has a right to marry unless he can provide a suitable home for the girl. Why has a girl any more right to marry when she is incapable of running the suitable home after he provides it?

Of course a girl might learn cooking and sewing, and as the other thing that pertains to her profession of homemaker, right in her own home—and some girls do—but are the majority of girls, left to learn the art of housemaking in this casual way, apt to put as much study and concentration upon it as if they were studying it in a regular school?

Besides, unless the mother is an exceptional housekeeper, it is unlikely that she would know much about each branch of domestic science as the experts who would be hired to teach them.

Now I know there are a good many people who are going to say that the new fangled ideas that these experts

### Ideal Ideas on Eatables

A SEMI-WEEKLY PUBLICATION OF SUGGESTIONS TO THE HOUSEWIFE

Published Every Tuesday and Friday in The State Journal From The Ideal Bakery, 121 West Sixth Street, Topeka, Kan.

VOL. 1. MAY 13. No. 17.

We have just installed a new American Meat Slicer. This is the latest improvement of the age in slicing meats, etc. It cuts clean and absolutely uniform. A big circular knife, the mechanism of which turns it at a rapid rate of speed. The slices may be cut in any desired thickness and every one will be the same. We have this machine in operation. We want you to come in and see it.

We are making preparations to put in a large fireless cooker, for baking all kinds of meats. You will then be able to buy what you need in the way of meat eatables, ready prepared and may have them sliced to suit your exact fancy. It cost us a hundred dollars to install the slicer and it will cost us much more to put in the fireless cooker, but we have built up a reputation for this place as "being different" and we WILL maintain and improve this policy wherever it is possible to do so.

Baked ham for luncheons, etc., is simply fine. We buy the choicest, sweetest, best flavored hams there are and bake them whole. Our way improves the flavor a great many per cent. Try some; we will slice it for you the new way. It sells for fifty cents a pound.

Have you gotten acquainted with cream horns yet? The horns are pastry, somewhat resembling ice cream cones—they are filled to the brim with delicious marshmallow cream. Talk about something good to eat, you just ought to try these, they are 30c a dozen.

will teach our girls all no nonsense for that the young girl will do better to learn the art of housekeeping just as her mother and grandmother knew it.

Aren't we altogether too willing to regard the science of housekeeping as something that can be left at a standstill while all the other sciences in the world progress?

My ideal school would have courses in simple economical cooking, making a specialty of the use of left-overs and the study of scientific food values, in plain sewing, mending and altering, in economical and intelligent buying not only of provisions but also of materials, and advanced courses for those who wished them in hatmaking, embroidery and dressmaking.

There are, of course, in some large cities industrial schools where these things are taught, but not in many, and only a small proportion of the girls even in these cities attend the industrial high.

I believe that such a school should be established in every city and town in the United States and that a one year course in it should be made a requirement for a high school diploma for a girl, and graduate courses

Coffee cakes of twelve different varieties will be ready for you tomorrow. We always bake up a big batch for Saturday's trade, but last Saturday we were entirely sold out before the day was through and many of our patrons were disappointed. However, we're going to be prepared. Get the kind you like best. They sell for ten and fifteen cents each.

Those fine imported figs are selling fast at the exceptionally low price of fifteen cents a pound, but we still have a few at that price. They are choicest quality, imported Turkish layer figs—the same kind as you buy at the confectionery shop and pay twenty-five cents a pound.

If you enjoy warm rolls for your lunch or supper you can get them right from the oven. Every morning at 11 o'clock they are ready and again in the evening at 4. This includes all kinds.

Are you fond of fruit cake? We make an excellent fruit cake which sells for twenty cents a pound. Of course, at this price this is not the richest cake that is made but it is as rich as most people want. It is simply packed full of fancy fruit and favored to perfection. Try it.

Cottage cheese, meat loaf, potato salad, macaroni and cheese, Boston baked beans, etc.—the same kind as the appetizing things to eat found on our delicatessen counter. They're all prepared in the very best fashion—the all sell at very reasonable prices. Don't spend all your time in the kitchen; you can get up a fine meal without this extra work by stopping here while you're up town.

should be open to those who had time for that the young girl will do better to learn the art of housekeeping just as her mother and grandmother knew it.

Why would not the study of the need of such a school and the possibility of having it established in your community be a good thing for the woman's club to which you belong?
